Curriculum Vitae

Rifan Ahmad Syauri 29 April 1995/ 29th

Full-stack Developer at Hijr Studio - Digital Creative Agency
Bogor, West Java, Indonesia

Summary

I have several years of experience in programming and website development in Indonesia. I have developed many small to medium-sized web applications using the latest technologies. My experience ranges from building simple single-page websites to complex multi-page enterprise applications.

I have worked on several projects using various frameworks such as Laravel, CodeIgniter, Node.js, React.js, and Next.js. In addition, I am an expert in PHP, REST APIs, CSS3, jQuery, and responsive design using HTML and Material Design guidelines.

Experience

Hijr Studio - Digital Creative Agency
Full-stack Developer
September 2019 - Present (5 years 6 months)
Bogor, Indonesia

I have worked on various projects, including creating market places, company profile websites, and web API services for mobile apps. I also helped design database structures for companies' content management systems

PT. Jasa Dan Kepariwisataan Jabar (Perseroda)
Web Developer
October 2018 - November 2019 (1 year 2 months)
Bandung, Indonesia

I contributed to the development of the GURILAPS app project (marketplace wisata jawa barat). My role involved creating the web app version and developing REST APIs.

PT Trias Cipta Mandiri - IT Cosultant
Full-stack Developer
November 2014 - October 2017 (3 years)
Bogor, Indonesia

Here, I worked on several projects, focusing on developing company portal systems for business management.

EGO. Advertising & Design
Web Developer
May 2013 - November 2014 (1 year 7 months)
Jakarta Utara, Indonesia

Most of my projects focused on creating web designs for clients and the company itself.

PT Bahtera Informatika
Web Developer
January 2012 - September 2012 (9 months)
Jakarta, Indonesia

This company focuses on providing technology for biometric recognition (face, fingerprints) and graph databases. In this company, I assist in developing systems tailored to client needs.
